SAP Transportation Management (TM)

SAP Transportation Management (TM) is a specialized module designed to streamline and optimize logistics and freight operations across the supply chain. It empowers businesses to plan, execute, monitor, and settle transportation processes with precision and agility.

Why Choose SAP TM?

- **End-to-End Visibility**
  Track shipments, monitor delays, and respond proactively with real-time data.
- **Cost Optimization**
  Automates freight cost calculation, rate comparison, and invoice verification—reducing overcharges and manual errors.
- **Improved Planning Accuracy**
  Advanced algorithms help optimize routes, loads, and carrier selection.
- **Compliance & Documentation**
  Ensures regulatory compliance with automated documentation and audit trails.
- **Collaboration Tools**
  Enables seamless communication between shippers, carriers, and customers.
- **Scalability & Flexibility**
  Suitable for small businesses to global enterprises with complex logistics networks.

What Is SAP TM?

- Freight planning and execution across all modes—road, rail, air, and sea
- Carrier selection and tendering
- Freight cost calculation and settlement
- Real-time tracking and visibility
- Integration with warehouse and order management systems

It's available as part of SAP S/4HANA or as a standalone solution, and it supports both inbound and outbound logistics.
